VI. SPORT PARTICIPATION GUIDELINES

I.S.D. #1 will provide numerous opportunities for students to participate in sport type activities at the elementary, junior high and senior high level. Through its sports activities at all levels, the district promotes good sportsmanship, the value of teamwork, opportunities for all students to participate, fairness and competitive successes. Depending on the level of competition, certain values are stressed over others.

Elementary Sports Program: All students regardless of gender will be given the opportunity to participate, learn and compete in sports open to them. Generally, the elementary sports program serves students in grades 4, 5 and 6. The only sport designated for males is wrestling (per this allowance by law). The primary goals or values promoted at this level will be good sportsmanship, skill development and participation. To this end, coaches are to consciously arrange for equal participation for all participants to the best of their ability. Under no circumstances will students at the elementary level of participation be moved “up” to the junior high level.

Junior High Sports Program: The junior high sports program serves students in grades 7, 8 and 9. Participation and season length are governed by school policy and the MSHSL. The primary goals and values promoted at this level will be good sportsmanship, skill development and participation over team success. Participation over team success means that the first priority is that all players will play a reasonable amount of time in each contest. Varsity coaches have the option of creating squads by grade (i.e. 7th grade baseball) or “blended” teams (i.e. junior high basketball-- 7th and 8th grade participate together). Playing squads would be developed with the squad being a team. Movement of players between blended squads would be expected throughout the season. If a 7th or 8th grade student is to be moved to the 9th grade level because numbers are such or player skills are developed for that level of play, it will be done only with the permission of the head coach and a letter in writing stating the reasons for the movement will be given to the Activities Director. As allowed by the MSHSL, students in grades 7-12 may participate at the varsity level (grade 10-12 program) if their skills are judged to be developed to allow for safe competition. This is the judgment of the varsity coach.

Senior High Sports Program: The senior high sports program, Varsity and B Squad, generally serves students in grades 10-12. The primary goals of the senior high program at this level is to teach good sportsmanship, skill development and to achieve team success through competition.
